

# VIRTUAL CISO SERVICES

CISO Expertise, Strategic Guidance, and Proactive Management - *without the CISO Expense*

## Cyber Threats Pose a Significant Threat to Your Business

65% of small and medium sized businesses and enterprises have experienced a cyberattack in the last year. Regulatory demands and cyber insurance requirements have never been more stringent. In today's climate, strategic cybersecurity guidance is a **necessity**, not a luxury. You need someone who can assess risks and vulnerabilities, create and execute a comprehensive cybersecurity plan, ensure compliance, and safeguard business continuity.

## Introducing vCISO from Quadrant - Defining, Managing, and Optimizing Your Security Programs.

Powered by a user-friendly AI-driven platform and integrating decades of CISO experience, our vCISO service offers the benefits of an in-house CISO – at a fraction of the cost. **We offer:**

### RISK ASSESSMENTS

Through a series of questionnaires and scans, we create a full assessment of your current risk level and cyber posture, compared to industry benchmarks. Also includes security gap analysis.

### COMPLIANCE

We identify which regulatory standards your organization needs to meet and perform a thorough compliance assessment to find gaps, prepare a plan to close them, and co-manage the execution.

### SECURITY POLICIES

We create a tailor-made set of easy-to-follow, actionable policies, adjusted to your specific needs, environment and tools, relevant regulatory requirements and industry benchmarks.

### REMEDIATION PLANS

We create strategic remediation plans with prioritized tasks. Each task is explained in a clear and intuitive way, making it easy to follow and implement. Each task includes impact and criticality rate.

### CYBER POSTURE

In-depth status and progress reports, showing your current security posture, improvement trends, compliance gaps, and industry benchmarks, to reflect your current security posture, progress and remaining gaps.

### OPTIMIZATION TUNING

We manage the ongoing execution of remediation plans – monitoring, scanning, and tweaking where necessary. This leaves you to focus on your core business, knowing that your security is in good hands.

## HOW OUR vCISO SERVICE WORKS.

**STEP 1: Automated Cyber Profile** – Together with you, we fill in a short series of questionnaires to assess your current policies, processes and tools. We also perform internal and external scans of your environment. Based on the answers and scan results, we automatically build a unique cyber profile for your organization.

**STEP 2: AI-Driven Assessment** – Leveraging the vCISO platform - powered by proprietary AI algorithms and modeled on the expertise of the world’s best CISOs - we parse your cyber profile against relevant external resources like the NIST Cybersecurity Framework, ISO 27001, CIS and other standards, industry benchmarks, and industry-based threat intelligence.

**STEP 3: Day-to-Day vCISO Operations** – We show you your current risk level, compliance readiness and overall cybersecurity posture, along with the tailor made policies and remediation plan we created for you. Then we move to ongoing cybersecurity management - working with you daily to achieve and maintain the level of security and compliance we defined together. We constantly update your security posture, risk level, policies, plans and tasks based on changes in your IT environment or processes, changes in compliance requirements and the relevant threat landscape.

## AREAS OF vCISO FOCUS

Our vCISO service comes complete with monthly check-in’s to review your cyber risk status and discuss active vulnerabilities. The areas of focus for our vCISO operations includes the following:

- ✓ **INFORMATION SECURITY STRATEGY**
- ✓ **SECURITY POLICIES AND PROCEDURES**
- ✓ **IT RISK MANAGEMENT**
- ✓ **IT COMPLIANCE**
- ✓ **SECURITY AWARENESS PROGRAMS**
- ✓ **INCIDENT RESPONSE**
- ✓ **SECURITY AUDITS AND ASSESSMENTS**
- ✓ **SECURITY TEAM STAFFING PLAN**
- ✓ **BUSINESS CONTINUITY AND DISASTER RECOVERY**
- ✓ **LEGAL AND REGULATORY LIAISON**

## Key Benefits

**Realize your security vision.** Our vCISO services develop a roadmap, plan of action, and implement changes. The end result: we bring your cybersecurity vision to reality.

**The right policies for YOU.** We create a set of security policies and remediation plans tailored to your unique business and industry – ensuring you have the right controls in place to mitigate risk.

**Maintain compliance.** We conduct automated and continuous compliance assessments, then create an actionable plan with a prioritized task list to achieve and maintain compliance, while tracking progress toward compliance goals.

**Continuously manage cyber posture.** Unlike one-time risk assessments that generate security posture and risk snapshots, our services continuously assess and update your real time posture, risk level, and compliance readiness.

Operating at the intersection of People and Product, Quadrant provides the best security technology and talent in a single solution.
