

CYBERSECURITY FOR PRIVATE EQUITY

SECURING YOUR INVESTMENT

ILLUMINATE RISKS TO **ELIMINATE** SURPRISES.

Your target acquisition could possibly be a target of another kind: *cyber attackers*, who take aim at Private Equity under the assumption they'll pay to make the problem go away. Small and medium businesses represent a soft target for criminal cyber actors, largely due to under-developed security practices that leave them vulnerable to intrusion.

Quadrant vets your potential investments cyber posture through proven compliance frameworks and controls, using skilled analysts, assessments, and penetration testing to help you understand the level of risk in play and how vulnerable their systems may or may not be.

WHO IS QUADRANT?

Operating at the intersection of People and Product, Quadrant is an MDR and security consulting firm committed to supporting organizations in all vertical markets by protecting their sensitive data and securing against threats.

- ✓ Founded in 2011 by security pros
- ✓ Headquartered in Jacksonville, FL
- ✓ Managed Detection & Response experts
- ✓ 24/7/365 security monitoring, staffed by seasoned, US-based practitioners
- ✓ 100% focused on cybersecurity

QUALITY OF CYBER: PRE-ACQUISITION DILIGENCE...

NO-TOUCH CYBERSECURITY DIAGNOSTIC

Using a variety of the latest scanning and analytics tools, our team of experts provide a high-level view on maturity and observable cyber risk associated with an acquisition target. This can be done any time, even before you sign LOI.

QUICK-HIT CYBERSECURITY ASSESSMENT

As you wrap up diligence and approach sign-and-close, our team will conduct an on-site penetration test, determine whether active security issues exist, and quantify overall cyber risk while recommending steps to remediation.

TAILORED CYBERSECURITY DEEP-DIVE

Advanced penetration test and deep-dive analysis of security controls and IT environment - from SaaS applications, cloud, firewalls, routers, switches, devices & servers. Complete with remediation recommendations and cost/ROI analysis.

CROSS-PORTFOLIO ADVISORY: PORTFOLIO-WIDE VULNERABILITY ASSESSMENT

Light-Touch Portfolio Cybersecurity Benchmarking:

Using a light-touch, survey-based approach, combined with a proprietary package of tools, technologies, and processes, we provide a security posture and cyber risk score for each company, comparing the companies across the portfolio to help you prioritize IT and cyber investments across the entire portfolio.

Portfolio Cybersecurity Deep Dive

Our team of cybersecurity experts will work with the IT teams of your various portfolio companies to conduct vigorous vulnerability and security posture assessments for each selected company, compare risks across portfolios, and help you prioritize cybersecurity investments, identifying opportunities for cost-savings via bundling.

SECURING YOUR PORTFOLIO COMPANIES

Cybersecurity Advisory Services

- Vulnerability Assessments
- Penetration Testing
- Information Security Policy

Managed Detection and Response

- 24/7 Security Monitoring
- EDR Platform
- Incident Response

Implementation of Key Security Technologies

- Firewall / IDS / IPS
- Back-up / Disaster Recovery
- Multi-factor Authentication
- Anti-virus / Malware Protection

Operating at the intersection of People and Product, Quadrant provides the best security technology and talent in a single solution.
